

# Schedule

A week-by-week breakdown of the material.

## Week 1

### Monday

- Introduction
- Writing Mathematics<sup>1</sup>
- Sets, set notation<sup>2</sup>
- Subsets<sup>3</sup>
- Set Operations<sup>4</sup>
- Quiz 0<sup>5</sup> (Due Monday night together with Quiz 1)
- Homework 1 due Tuesday<sup>6</sup>
- Prepare for class presentation:
  - Exercises 1.9, 1.19, 1.34

### Tuesday

- Indexed Collections of sets<sup>7</sup>
- Set Partitions<sup>8</sup>
- Cartesian Products<sup>9</sup>
- Quiz 1<sup>10</sup> (Due Monday night together with Quiz 2)
- Homework 2 due Wednesday<sup>11</sup>
- Prepare for class presentation:
  - Exercises 1.41, 1.54

### Wednesday

- Statements<sup>12</sup>
- Negations<sup>13</sup>

---

<sup>11</sup>[assignments/hw2.html](#)

<sup>12</sup>[notes/statements.html](#)

<sup>13</sup>[notes/negation.html](#)

- Disjunction and Conjunction<sup>14</sup>
- Implications<sup>15</sup>
- Quiz 2<sup>16</sup> (Due Tuesday night)
- Homework 3 due Thursday<sup>17</sup>
- Prepare for class presentation:
  - Exercises 2.18, 2.29, 2.32

## Thursday

- Biconditional<sup>18</sup>
- Tautologies, Contradictions<sup>19</sup>
- Logical Equivalence<sup>20</sup>
- Fundamental properties of logical equivalence<sup>21</sup>
- Quiz 3<sup>22</sup> (Due Wednesday night)
- Homework 4 due Friday<sup>23</sup>
- Prepare for class presentation:
  - Exercises 2.39, 2.50, 2.53

## Friday

- Quantified Statements<sup>24</sup>
- Characterization<sup>25</sup>
- Quiz 4<sup>26</sup> (Due Thursday night)
- Homework 5 due Monday<sup>27</sup>
- Exam 1

## Week 2

### Monday

- Quiz 5 (Due Sunday night)

---

<sup>27</sup>[assignments/hw5.html](#)

## **Tuesday**

- Trivial and Vacuous Proofs
- Direct Proofs
- Proof by Contrapositive
- Quiz 6 (Due Monday night)

## **Wednesday**

- Proof by cases
- Direct and Contrapositive proofs for divisibility
- Direct and Contrapositive proofs for congruence
- Direct and Contrapositive proofs for real numbers
- Quiz 7 (Due Tuesday night)

## **Thursday**

- Proofs involving sets
- Properties of set operations
- Proofs involving cartesian products of sets
- Quiz 8 (Due Wednesday night)

## **Friday**

- Catching up
- Quiz 9 (Due Thursday night)
- Exam 2

## **Week 3**

### **Monday**

- Proofs by counterexample
- Proofs by contradiction
- Existence proofs
- Disproving existence statements
- Quiz 10 (Due Sunday night)

### **Tuesday**

- Principle of Mathematical Induction
- General Principle of Mathematical Induction

- Strong Principle of Mathematical Induction
- Proofs by Minimum Counterexample
- Quiz 11 (Due Monday night)

### **Wednesday**

- Conjectures
- Introduction to Relations
- Quiz 12 (Due Tuesday night)

### **Thursday**

- Properties of Relations
- Equivalence Relations
- Quiz 13 (Due Wednesday night)

### **Friday**

- Equivalence Classes
- Quiz 14 (Due Thursday night)
- Exam 3

## **Week 4**

### **Monday**

- Congruences as an equivalence
- Arithmetic on Integers modulo  $n$
- Definition of functions
- Quiz 15 (Due Sunday night)

### **Tuesday**

- One-to-one and onto functions
- Bijective functions, Inverse function
- Image and inverse image of sets under functions/relations. Properties
- Quiz 16 (Due Monday night)

## **Wednesday**

- Numerically Equivalent sets
- Denumerable sets
- Quiz 17 (Due Tuesday night)

## **Thursday**

- Uncountable sets
- Comparing cardinalities
- Schroder-Bernstein theorem
- Quiz 18 (Due Wednesday night)

## **Friday**

- Wrap-up
- Exam 4
